## **DETAILED ACTION**

### *Allowable Subject Matter*

1. Claims 7, 9 and 10 are allowed over the Prior Art of record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the three independent claims is the inclusion of the specific limitation of the relative sizing of an insertion member in an apparatus for detecting the lowering of a top surface of a liquid, in claim 7, the width of the insertion member being at least as large as a width of a float associated therewith; in claim 9, wherein the insertion member has first and second side faces, wherein the second side face is curved around the axis that is substantially parallel to the longitudinal axis of an associated dowel; and in claim 10, wherein a lateral surface of a housing is curved around a curvature axis that is substantially parallel to the longitudinal axis of a dowel, and wherein the curvature axis is substantially collinear with the longitudinal axis of the dowel. The closest reasonable Prior Art reference to the instant invention is US 4,081,638 to Thorn et al., which discloses a similar level measuring device having many of the disclosed elements, however, fails to teach the specific limitations above, nor any motivation to modify the disclosed invention, for example, to fit on the top of upstanding pipes/conduits, as is the case of the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
